

I'm Pissed Off:

as defined in the Oxford dictionary

pissed of:- British and North American English

very angry or annoyed

When I was just a little child my teacher said to me

Your nails are long yes far to long for you to be a he

My tiny brain said wow that's good I know I am a she

BUT

My father said and the pastor said you are a son and heir

You cannot play with the girls or wear dresses fine and fair

AND

So it went past my puberty I was a sissy boy

Who was fem. but acted masc. and knew he was a fraud

My world provided no choice at all I had to be a bloke

But after all was said and done I was simply broke

Late in life my truth did out and now I'm just a girl

Its not a very easy truth I am often in swirl

I too often hear words that are not true at all

Ignorance hurtful lies and tales extraordinary tall

Looking back on my medical profession

I emotionally engaged with humans and their intimate confessions

I lived a life full of science and numbers and facts

Evidence based and not reliant on religious obsessions

SO

When ideolog pollies say: we know what is best

You shall fit into our binary and you will agree to be blessed

That you will endure your chest growing unwelcome breasts

Or your fem face turning masc with Adams apple and a voice to match

And when they say we know who you are and what should be in your knickers

I GET PISSED OFF

We have been here forever, known to all cultures
Pathetic Small minded zealots counting votes like vultures
Wishing to dismiss us to deride us to harm us
Hoping we will go away and stop making a fuss

BUT we are PISSED OFF

Because our Government has let us down
We want best practise health care and basic human rights
We want care and concern we should not have to fight
We want our doctors and health professionals
Free to abide by their code of what's right
We don't want our government
Ignoring its rules and running amuck
Copy our doctors and first do no harm
But whatever you do
Do not mistake my calm

I Am PISSED OFF
